PROFESSIONAL EXPERIENCE

Under NDA   **Jun 2024 - present**
React / NextJS Developer

Project: A web-based admin panel ecosystem that supports campaign lifecycle management and strategic data-driven decisions. The applications allow administrators to configure campaigns, define user roles and permissions, and enable customers to analyze collected campaign data.

Responsibilities:

- Building and maintaining admin panel applications for campaign management and data analysis.
- Implementing responsive UI with role-based access and modern design systems.
- Managing API integration and server state using React Query and Axios.
- Setting up CI/CD pipelines and automating deployment processes.
- Deploying applications to VPS environments and ensuring production readiness.

Technologies:
- React, Next.js, TypeScript, Vite, React Query, Axios, Tailwind CSS, shadcn/ui

Drupfan   **Aug 2023 - Jun 2024**
React / NextJS Developer

Project: An admin panel for an ed-tech company to manage courses, students, and user roles, enabling efficient course organization and progress tracking.

Responsibilities:

- Building user-friendly, high-performance web applications using React.js/Next.js.
- Translating designs and wireframes into high-quality code.
- Optimizing components for maximum performance across a wide variety of web-capable devices and browsers.
- Developing new user-facing features using React.js/Next.js.
- Utilizing various data structures and working with remote data sources, REST APIs, and JSON.
- Collaborating with a team of developers, designers, and product

Technologies:
- NextJS, TypeScript, Redux, MUI and other classic FE tools

IdeaSoft

Sep 2021 - Aug 2023
